Allowable Subject Matter

1. Claim 1, 3, 6, 8 and 14 are allowed.
2. The following is an examiner's statement of reasons for allowance:

(1) Claims 1, 3, 6, 8 and 14 are directed to information processing method, computer-readable medium having information processing method stored therein and information processing apparatus. Claims 1, 6 and 8 identify the uniquely distinct features of having outputting by the processor in three different ways:

a) in a case where the black-printing compensation is applied and that the input color data does indicates a simple black color, outputting color data for the simple black color using the source profile and the relationship between lightness levels and black color;

b) in a second case where the black-printing compensation is not applied, outputting color data by using the source profile and the second color conversion, without using the relationship between lightness levels and black color;

c) in a third case where the black-printing compensation is applied and the input color does not indicate simple black color, outputting color data by using the source profile and the second color conversion, without using the relationship between lightness levels and black color.

K' is determined previously, and then one conversion table of CMYK to C'M'Y'K' are generated based on the determined K', either singularly or in combination with other cited references fails to anticipate or render the above underlined limitations obvious (when used with all the claimed limitations).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
